

# YOUR PARTNER IN PROJECT MANAGEMENT

Conducting a clinical trial is overwhelming with critical milestones to meet, managing budget and speeding time to market. A BBA project manager is there to be your partner to drive the trial execution team across all stakeholders. With their effective leadership skills and industry expertise, our project managers excel in the oversight of trial conduct, progress reporting, risk mitigation and budgeting. Our project managers are skilled at providing excellent client service and proactive communication.

Central to the success of a project manager is an understanding of the given therapeutic area. BBA assigns project managers based on therapeutic expertise. BBA project managers work on phase I-IV trials in many therapeutic across the globe. All project management activities are conducted in compliance with the trial's protocol, project plans, standard operating procedures, ICH-GCP and all applicable regulations and guidelines.

## PROJECT MANAGEMENT FUNCTIONS INCLUDE:

- Oversight of BBA team member activities
- Creation of project management plans
- Management of timelines and deliverables
- Budget tracking and management of quality deliverables
- Proactive communication with the sponsor, vendors and sites
- Management of predefined metrics and study trends
- Oversight of data quality
